WhatsApp Selling Guide

THINGS TO NOTE WHILE SELLING ON WHATSAPP

1. Groups — Always Add a CTA

In your group follow-ups, always include a Call to Action (CTA). Your CTA can be your affiliate link or your account details for payment.

2. Status — Do NOT Post Affiliate Links or Account Details

On your status, avoid posting your affiliate link or payment details directly. Instead, create curiosity-driven CTAs. Example: "The first 5 people to send me a DM right now get the discount." This drives people into your inbox where you can close them.

3. Status — Keep It Engaging & Thought-Provoking

Your status is meant to keep your audience engaged and curious. Provoke them into asking for more details about the product (e.g. how to make money online). When they ask, calmly explain without rushing — then send them the VSL to watch. This speeds up your closing process significantly.

■ Important Note

Do NOT offer discounts every time. Constantly posting discounts reduces your product's perceived value. Use discount CTAs sparingly and strategically to maintain premium positioning.

Tuesday	Testimonies + Writeups
